### **DETAILED ACTION**

NOTE: because of the inconsistencies of the previous drawings and specification, and the newly submitted amendments and drawings, the following action is made final with new grounds of 35 USC 112 Rejections made. Applicant's clarification of the drawings has led to further clarification of the claims as originally stated which are now seen to contain informalities in clarity.

#### ***Drawings***

The drawings were received on 10/17/05. These drawings are accepted.

#### ***Oath/Declaration***

The new Oath filed 11/14/05 is accepted by the examiner.

#### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1,3-12, 13-18 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. With respect to the independent claims it is unclear exactly how the locking member, threaded member and threaded rod, and positioning means as well as clamping member interact. There is some confusion as to which pieces of the figures and the specification these parts refer to as stated in the claims. Also as stated in the claims it is unclear how the control arm is maintained perpendicular to the central axis of the component. Perhaps the applicant

Art Unit: 3643

means that the "transverse axis of the control arm" is perpendicular to the central axis of the component.

3. Claims 18-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear from the specification and claims as well as the figures if the applicant has two separate pieces which are called the "threaded rod" and the "fastening member". From the figures it appears that the applicant only has one object which can be inserted through the other objects of the figures and claims.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3643

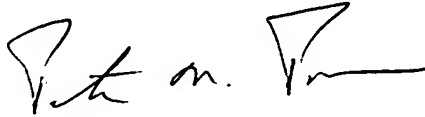

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
